**Subject:** Sharda Boscalid question

Hi Marietta,

Good morning.

Thanks for your reply on my email regarding pyraclostrobin.

I have a another question for you regarding some applications by Sharda. In the case of the Boscalid petition to deny, where Sharda changed from selective to cite-all, you were able to issue a denial decision on that petition. My question is, are you also able to make decisions on other petitions that have similar circumstances? I am trying to understand when you, rather than OGC, can make the determination and decision. Let me know if you prefer to discuss in a phone call. Thanks very much.

Best regards,

Jim, I just found this message in my junk mail. I am copying Cynthia on this for a reply.

Regards,  
Marietta

Hi Marietta,

Sorry to bother you on this. But the Prie date for this action is Mar 14. I am told today by Nathan Mellor that although all science reviews are completed that registration cannot be approved until a non-science group in EPA authorizes RD to proceed. Is that something you could help with?

Best regards,
